

Template Reflection “Flip” tessellation -Dog

Make the “dog” template cutout design here:

1. Draw an arched line from the bottom right corner(C) to the top (A) (to form the dogs hind legs).
2. Make sure that you measure the distance from the corner (B) to the start of the curved line (A).
3. Draw a line from the bottom right corner (C) to the left (D) (forming the dogs head/neck). *Make sure that the distance from D to E is the same as from A to B. This way the dogs neck will match perfectly later when you tape them.
4. Flip over the hind leg cut-out(#2) so you do not see the lined paper but only white. Next rotate it and tape it on the section on the left.
5. Turn over the dogs head/ neck so you do not see the lined paper anymore. Tape it to the top left corner.

This is what it looks like when the Dog is cut out, taped down and designed.
