

Silhouette Sketches for the *self-portrait* Collage Project

Directions: Create 2 sketches of your color paper silhouette design before starting the project: A silhouette has no interior details. It is the image of a person, animal, object or scene represented as a solid shape of a single color.

Using the **1, 2, 3 method**, sketch a background scene silhouette here:

Draw a rough draft sketch of a basic background scene

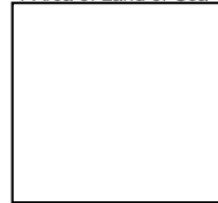

Where is your scene going to take place? (The beach, city, mountains, school, mall, football field, farm, music room, etc.) Look at sample silhouette images online for inspiration. Make sure that these are just silhouettes and you don't need to include details inside. Remember that the collage background will be first made from cut out construction paper so this is just a silhouette and then we will add cut magazines/newspaper later.

Sketch 1 area of land, or sea (city street, beach, forest floor, desert sand, farm land, interior of house, etc.)

1 Area of Land or Sea

Sketch 2 objects that go on top of the land or sea area that relate your your self portrait. (Barn, palm trees, city buildings, desert rocks, etc.)

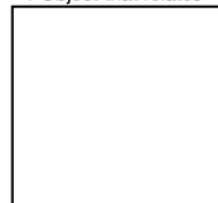

1 Object that relates

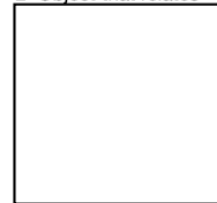

2 Object that relates

Sketch 3 sky or ceiling related objects (sun, moon, birds, clouds, stars, indoor lights, etc.)

1 Sky or Ceiling

2 Sky or Ceiling

3 Sky or Ceiling

Figure silhouette: Next sketch 1 or more silhouette figures. Later you will glue the figure(s) on top of your background scene. One of the figures has to be you (self-portrait) but you can have other figures as well. Look at silhouette figure examples online.

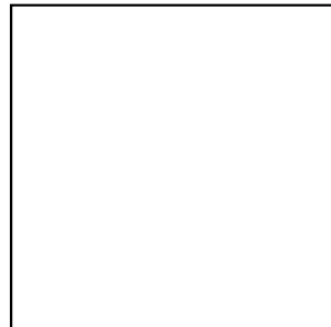

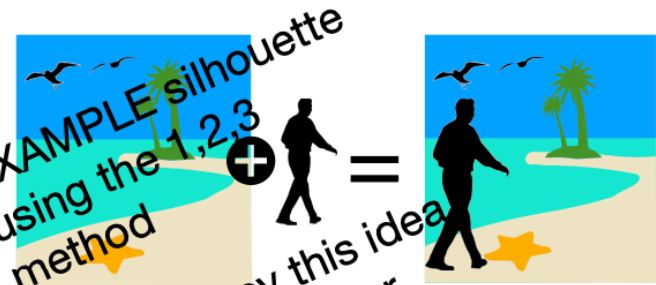

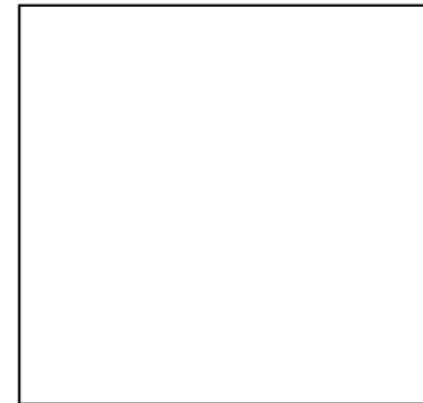

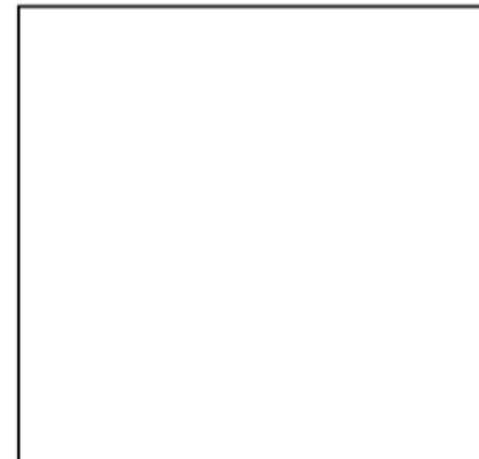

Figure silhouette(s)

Do not copy this idea but make up your own!

Draw all 3 categories together like the example above. Make it original!

Add the silhouette figure on top of your drawing with all 3 categories combined like example above.
